FROM THE AMERICAN PEOPLE

SERVIR 

In the below table...

- “Red” represents radiance/reflectance in the red band
- “Green” represents radiance/reflectance in the green band
- “Blue” represents radiance/reflectance in the blue band
- “NIR” represents radiance/reflectance in the Near infrared band (0.85 - 0.88 microns on Landsat 8)
- “Swir1” represents radiance/reflectance in the first shortwave infrared band (1.57-1.65 microns on Landsat 8)
- “Swir2” represents radiance/reflectance in the second shortwave infrared band (2.11-2.99 microns on Landsat 8)

Index Name	Formula	HYDRAFloods Code	Reference
Modified Normalized Water Index (MNDWI)	$\frac{green - swir1}{green + swir1}$	Python hf.mndwi	https://doi.org/10.1080/01431160600589179
New Water Index (NWI)	$\frac{blue - (nir + swir1 + swir2)}{blue + (nir + swir1 + swir2)}$	Python hf.nwi	https://www.mdpi.com/2073-4441/13/12/1647
General Water Index (GWI)	$(green + red) - (nir + swir1)$	Python hf.gwi	https://github.com/Servir-Mekong/hydra-floods/blob/master/hydrafloods/indices.py
Automated Water	$4.0 * (green - swir1) - ((0.25 * nir) + (2.75 * swir2))$		https://doi.org/10.1016

Extraction Index No Shadow		Python hf.aewinsh	/j.rse.2013.08.029
Automated Water Extraction Index with Shadow	$blue + 2.5 * green - 1.5 * (nir + swir1) - 0.25 * swir2$	Python hf.aewish	https://doi.org/10.1016/j.jrse.2013.08.029
Land Surface Water Index	$\frac{(nir - swir1)}{(nir + swir1)}$	Python hf.lswi	https://doi.org/10.1080/01431160802572653
Water Ratio Index	$\frac{(green + red)}{(nir + swir1)}$	Python hf.wri	https://doi.org/10.1109/GEOINFORMATICS.2010.5567762
Multi Band Water Index	$(3 * green) - red - nir - swir1 - swir2$	Python hf.mbwi	https://doi.org/10.1016/j.jag.2018.01.018

Modified Water Index	$1 - (NDVI - MNDWI)$	<div>Python hf.mwi</div>	https://ieeexplore.ieee.org/document/9011209

Acknowledgements

HYDRAFloods was developed by SERVIR-Southeast Asia (formerly known as SERVIR-Mekong). The development team includes Kel Markert, Amanda Markert, Ate Poortinga, Nyein Soe Thwal, Arjen Haag, Farrukh Christie, Tim Mayer, Khun San Aung, Peeranan Towashiraporn, David Saah, Chinaporn Meechaiya, Biplov Bhandari, and Kamal Hosen.

The HYDRAFloods Curriculum was organized by SERVIR's Science Coordination Office. The modules were influenced by a training developed by Kel Markert, Tim Mayer, Biplov Bhandari, and Lauren Carey and the HYDRAFloods Documentation authored by Kel Markert. Review of the curriculum was conducted by Roelof Rietbroek, Kelsey Herndon, Emil Cherrington, Diana West, Katie Walker, Lauren Carey, Jacob Abramowitz, Jake Ramthun, Natalia Bermudez, Stefanie Mehlich, Emily Adams, Stephanie Jimenez, Vanesa Martin, Alex Goberna, Francisco Delgado, Biplov Bhandari, and Amanda Markert.
